

Defy the laws  
of time!

Want healthy  
teeth for life?

FLUORIDEX®

DISCUS™

Inspired by you.™

## As you age, your teeth do too!

There are many features of your teeth that change along with your age. Some of those characteristics include:

- Strength
- Stability
- Color
- Luster
- Beauty

## A fountain of youth for your teeth.

With all of the cosmetic procedures, skin creams and other anti-aging tonics available today, it is becoming easier and easier to achieve a more youthful appearance. But what about your teeth? Is there a way to maintain strong, beautiful teeth as you get older too?

The answer is **yes!**

## Fluoride is the key.

Most people assume that the fluoride they get from drinking water and over-the-counter toothpaste is adequate for their needs. This is not necessarily true. However, the use of a prescription strength fluoride toothpaste can aid in the prevention of tooth decay while increasing enamel strength.

## The secret to healthy teeth for life.

Fluoridex Daily Defense® is a prescription strength fluoride toothpaste that will enhance the remineralization of your teeth for a more youthful smile. With **5 times** the active ingredient of over-the-counter toothpaste, Fluoridex provides maximum fluoride uptake to give you strong, beautiful teeth.

**Fluoridex Daily Defense®** is available in a 1.1% neutral sodium fluoride toothpaste or gel. When used on a daily basis, this formula will help you maintain strong teeth and healthy gums.

**Fluoridex Daily Defense® Enhanced Whitening Formula** is a 1.1% neutral sodium fluoride with the added benefit of keeping your teeth as clean and bright as possible.

**Fluoridex Daily Renewal®** is a 0.4% stannous fluoride toothpaste. If you suffer from advanced periodontal disease, this may be the perfect choice for you.

*Ask your dentist or hygienist which formula is right for you!*
